About Me

Experienced Software Developer with over 10 years of hands-on expertise in Android, Node.js backend engineering, Flutter, and software architecture. Proven track record of delivering high-quality, scalable solutions for diverse clients. Seeking opportunities to lead innovative projects and contribute to cutting-edge technology solutions.

Professional Experience

Systica Systems
Lead Software Architect
Kochi, Ernakulam, India
2014 : Sept – Present

Key responsibilities:
- Spearheaded the creation of cross-platform mobile applications using Flutter, leading to a significant reduction in development time and a substantial increase in user engagement.
- Engineered and deployed resilient, scalable backend systems with Node.js, efficiently managing a high volume of concurrent requests and significantly improving response time.
- Worked closely with multidisciplinary teams to devise intricate software solutions for clients across various sectors such as e-commerce, social media, healthcare, and finance.
- Provided mentorship to junior developers, facilitated code reviews, and enforced best practices, resulting in a notable enhancement in code quality.

Personal Strength

- Excellent problem solving, communication, and collaboration
- Ability to work for long hours without losing patience and enthusiasm
- Strong analytical and creative problem solving
- Working As an independent developer
- Passionate to update my knowledge and skills though continuous self-learning

Educational Background

- BA (English Literature)
  2011 - 2014
  Farook College - University OF Calicut, Kerala, India
